Tanfield, 8:00 a. m., 12:30, 4:30

In the Virginia Convention, the other day, Mr. Hunnicut offered a proposition the purpose of which is to relieve from political disability and liability all those who, having once been rebels, have become faithful in their adherence to the Union. Hunnicut is a warm and zealous loyalist, as he has been all through the trying scenes of the past six years; but that he is guided by the soundest discretion in all his movements need not be believed. Much that he has said and done, since he came prominently before the public, has been imprudent, rash and calculated to exacerbate and sour the feelings of one party toward the other. He is a sort of Brownlow in his modes of speech, and gives more forcible than eloquent expression to his thoughts.

That such a man initiates a measure for restoring to their former political privileges those who manifest a disposition to return to their allegiance, is a symptom of the return of good feeling, though it does not signify so much as it would if it were the first or a solitary instance of the kind. Such has been the feeling of the loyal masses from the cessation of the war. No spirit of hostility or resentment has marked their conduct; and the efforts of press and individuals, who are in sympathy with the rebellion, to make the people think all efforts to suppress the treason, punish traitors or restore the Union on a safe basis are actuated by hatred and malice, are false and outrageous. We hope Hunnicut's measure will prevail, and all the true Union men, whether originally so or recent converts, will be good and faithful citizens working in harmony for the common welfare.

REV. BISHOP HOPKINS.

This eminent prelate who died on Thursday of congestion of the lungs and pleurisy, was at the time of his decease, Bishop of the Episcopal Church in Vermont and Presiding Bishop of the Protestant Episcopal Church in the United States. He was seventy-six years of age, having been born to Dublin, January 5th, 1772.

He came to America with his parents in 1820. He received a full classical education, having been designed for the legal profession, but in his nineteenth year he engaged in the iron manufacturing business in Western Pennsylvania. This interest was entirely protracted at the close of the war with Great Britain, and in 1817 he retired from it a bankrupt, commenced the study of law, and was admitted to the bar in about six months from that time. In 1829, he determined to prepare himself for the ministry, received Holy Orders, and became the rector of Trinity Church, Pittsburgh. In 1827 he was a candidate for the assistant bishopric of the Diocese of Pennsylvania. Dr. H. U. Onderdonk being elected only by a majority of one vote, which was given by Dr. Hopkins himself. In 1831 he was called to the office of assistant minister of Trinity Church, Boston, and at the same time was appointed to a professorship in a new theological Seminary that had been established in the Diocese of Massachusetts. In 1832 he was elected the first Bishop of the new Diocese of Vermont, and was consecrated in New York, October 21st by Bishop White. He united with the duties of the Episcopate, those of the Rectory of St. Paul's Church, Burlington, Vt., and filled the latter position till 1855, after which he devoted himself wholly to the work of the Diocese and the establishment, of the "Vermont Episcopal Institute." Bishop Hopkins was widely known beyond the limits of his own denominational connection, not only for his eminence as a prelate, but also through his many published writings on philosophical, theological and political topics, which showed him to be a profound thinker, a clear reasoner, and a bold and original investigator, bearing in many of his opinions upon public questions he fell far behind the sentiment of loyal and patriotic persons in this country, and gave expression to views, sustaining them with all his logic, that are unsatisfactory to all except the extreme conservatives and advocates of human slavery.

DUTTNESS OF TRADE.

There is a general complaint just now among business men at the failure of trade. As a consequence of this distress, those engaged in mercantile pursuits, or in any calling which needs a proper publicity to insure success, feel somewhat disheartened, and are prone to fold their hands and utter complaints. It is in just such times as those that the acute, watchful man of business reads his harvest. While others bewail the hard times, and reprove their calling from the notice of the public altogether, by having their advertisements, the careful merchant takes advantage of their neglect and, by a more enlarged system of advertising, attracts the public attention and naturally creates the dollar. A systematic and well-directed system of advertising will do much to secure success in trade at this juncture."

To the above from the *Newspaper*, we add the following from the *Tribune*:

"In the meantime, how are business men to keep all the two great lessons to be learned: but there is one part of these lessons which in due time is especially apt to be forgotten. Be sure of one thing; whatever you have to sell, there are many people ready to buy, even in the most depressed seasons. Find them out; show them your wares; persuade them to buy of you rather than of another. When buyers are reluctant, sellers must be active. It is neither cheap nor possible to sit still behind your counter and wait for the bustle of trade to revive. When business is dull, that is the very time to advertise; and in the second, that is when people devote most time to reading the newspapers, and when your advertisement is most generally seen."

The Cincinnati *Commercial* thinks that the reports of destitution which are now coming from the South—particularly from Ohio's district—are greatly exaggerated. So far as the best information goes to show, the destitution is rather prospective than present. It may be greater before spring, but just now it is not alarming. Among the blacks it has been largely caused by the actions of the planters in discharging their hands at the close of the season, in violation of all their contracts, and in some cases disuniting them because they took the Republican ticket.

European News.—At a large concert at the dinner at Berlin, Wednesday evening, Count Von Bismarck was present and made a speech. He reviewed the present political situation in Europe in the course of which he said that war with France this year was a phantom, and urged his hearers to dismiss all fears in the matter. He was listened to with profound attention.

Piggott, editor of the Dublin *Irishman*, whose arrest has been noticed, is charged with eight seditions libels uttered last year. Piggott is a son of the Chief Justice of Ireland.

Barker, Casey, Shaw and Mullany, the Fenians arrested at Birmingham on a charge of buying arms there for the brotherhood, were brought up at Bow street, Thursday, for examination. Bail was offered, but not accepted, and the prisoners were sent to Birmingham for trial for treason and felony. The van containing the prisoners, in its transit to and from Bow street was guarded by a strong escort of military and several platoons of police, all under arms and with drawn cutlasses. These extraordinary precautions were adjudged necessary, as the authorities had received information of a threatened rescue. There were no disturbances, however.

Disputes received at Vienna, on Thursday, state that the Austria frigate Novara, Admiral Tegethoff with the remains of the late Maximilian on board, has arrived at the port of Corfu, on the way to Trieste.

RAISE MORE CATTLE.

That the profitable raising of calves on dairy farms will be attended with some considerable trouble, there is no doubt; but on ordinary farms, where, as on the great majority of farms in this country, only a limited number of cows are kept for the purpose of making butter, there exists no difficulty in the profitable raising of good calves, especially those who live a great distance from market, and where grain growing, dairying &c. is not profitable. Farmers are not agreed whether the calf shall suck or drink its milk, some practice the one and the other method. The latter method is, however, more generally practiced so far as our observation goes. A calf that is taught to drink sooner learns to shift for itself, it is thought. The ordinary custom is, when calves are to be taught to drink, to let them remain with the cows four or five days until the milk is gone. This is said to be beneficial to the cows, the udders of which are sometimes hurt.

As soon as it will drink milk readily, or when 10 or 12 days old, put skin milk may be added, first warming it sufficiently, with the addition of a small handful of sifted meal, stirring it while drinking; this skin milk may be gradually increased and the new milk diminished until it is about 3 weeks old, when the whole feed may consist of skin milk. The meat should also gradually increase, as it is useless to distract a calf to thrive on skin milk alone; any kind of meat, or a mixture of different kinds will answer the purpose. A little sweet hay should now be given.

The exact effect produced by the various kinds of food used in growing the young and sustaining the mature animal, has not been so minutely determined, practically, by scientific men, as it deserves to have been.

Yet there is much more known upon this subject than has ever been practically applied by the general stock raiser, and which when understood and applied will enable
